hello

a getting-started zine
for a box
that plays text.

set in the deck's own 12x24 and 6x12 faces; two inks, one
bit each; every picture drawn by its engine. a deck after
gibson [7], a
grid after weingart, sometimes called swiss punk [23].
full references: zine/README.md. copy it, fold it, pass it on.

.....

.....

the engine
"might compose elaborate
and scientific pieces of
music of any degree of
complexity or extent."

ada lovelace, 1843 [9]

.....X.....

>room

• room? try: help

1843	lovelace	an engine could compose [9]
1963	mathews	the computer, an instrument [10]
1964	riley	in c: 53 phrases, repeated [17]
1968	reich	music as a gradual process [16]
1971	xenakis	formalized music [24]
1986	spiegel	music mouse [20]
1987	obarski	the tracker [14]
1996	eno	generative music 1 [6]
2002	mccartney	supercollider 3 [11]
2003	collins et al	live coding [4]
2004	toplap	show us your screens [21]
2005	toussaint	euclid: open here still [22]
2013	aaron, blackwell	sonic pi [1]
2014	mclean	tidal [12]
2014	collins, mclean	algorave [5]
2017	jack	hydra [8]
2023	roos, mclean	strudel [18]
2026	you	this box

.....X.....

what

a keyboard, a screen that
needs daylight, a clock.

for anyone who lost a
night to a tracker, a
patch cable or a
semicolon.

x is a hit. . is a rest.
now form a band [13].

on the deck: an ep of four - grid, offset, drill,
orbitals. each ends in silence; any follows any.

..... ..

..

you type lines.

a line is a lane.

lanes play: drums, synths,
filters, pictures.

no mouse. no menu. no mode.

the page you are editing
is the page that plays.

pictures

six fields, ten operators,
no shapes.

fields: disc box turn ramp grid noise
levels: mask edge
bends: echo move spin warp grow thin flip fold

a ring is a disc through an
edge: >disc 8 >edge 1

orbitals, drawn by the deck: a planet, x at 16 steps and
y at 12, round a sun on the beat; night, day, eclipse.
echo keeps the trail: feedback is the trick [8].

a lane that ends can start
another. no timeline: an
arrangement is endings.

>knob1 = knob and >oso in 9000: a phone, a laptop or
another deck sends /deck/knob1 and >route out knob1
follows it. the value lives here, so losing the phone
loses nothing.

the deck talks back:
♦ _ needs a note before it
♦ a chord goes in []: [0,4,7]
♦ a name is letters: conga
♦ 16 lanes is all there is.
♦ run cannot run itself

.....

laptop sets taught crowds
to read projected code as
proof that it was live
[21][4][3].

here the gesture and the
sound are one thing to
watch [19][15][2].

an esp32-s3 and a 400x300 reflective panel, one bit, no
backlight. 96 ticks a beat, 16 lanes, 37 verbs. usb midi
jitter at the host: 0.03 ms, measured. it makes no sound
itself: it sends midi, oso and pictures to what does.

....

hello

```
>kick 9...8...9...8...
```

velocity is ink

```
>play
```

names

the names are yours:

```
>conga = note 63
>strings = voice 3 ch 5
>fx = cc 20 ch 2
>strings = ch 6 moved.
>conga = gone.
```

anything drives anything:

```
>route cut kick
>route disc kick
>tom x.x.x.x. !2
>route crash tom:end
```

```
strudel: bd ~ sd ~
here:    x.x.
```

51 of 51 corpus patterns play what strudel 1.2.6 plays,
note for note [18][12].

what the deck will not play, it refuses, and boxes the
character:

```
>hat x...X...  X is gone: 9 is loud
>hat x...?...  ? is gone: x%50 is maybe
>hat x.-.      - is not a rest here: .
```

.....

```
ctrl+enter runs the line
enter       makes a line
```

again, while it plays:
gone. again: back.

>toggle kick hat
a block, off and back.

it sends midi, not sound.

```
>usb on to a computer:
        the deck restarts
        as a midi device.
>din 17 to a synth, with
        no computer. build
        the cable first.
```

drums on channel 10, bass 1, lead 2, pad 3, arp 4: the
names are lines in the boot document. change them there.

.....

* * * * *

* * * * *

16

16 against 12 comes home
every 3 bars. that is all
polyrhythm is.
